

ASSIGNMENT 4

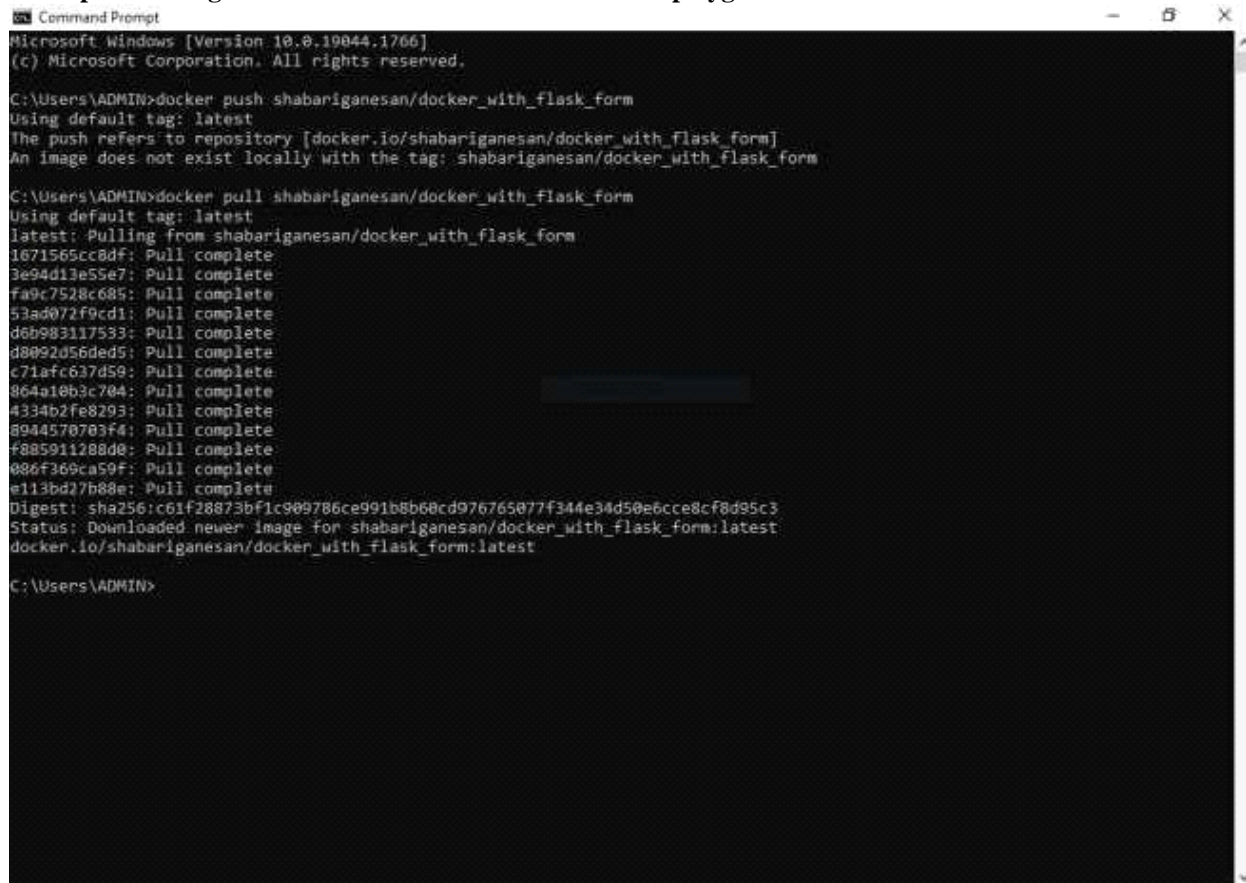

TEAM ID : PNT2022TMID50577

PROJECT NAME : NUTRITION ASSISTANT APPLICATION

NAME : S SUSEELA

Question-1:

pull an image from docker hub and run it in docker playground

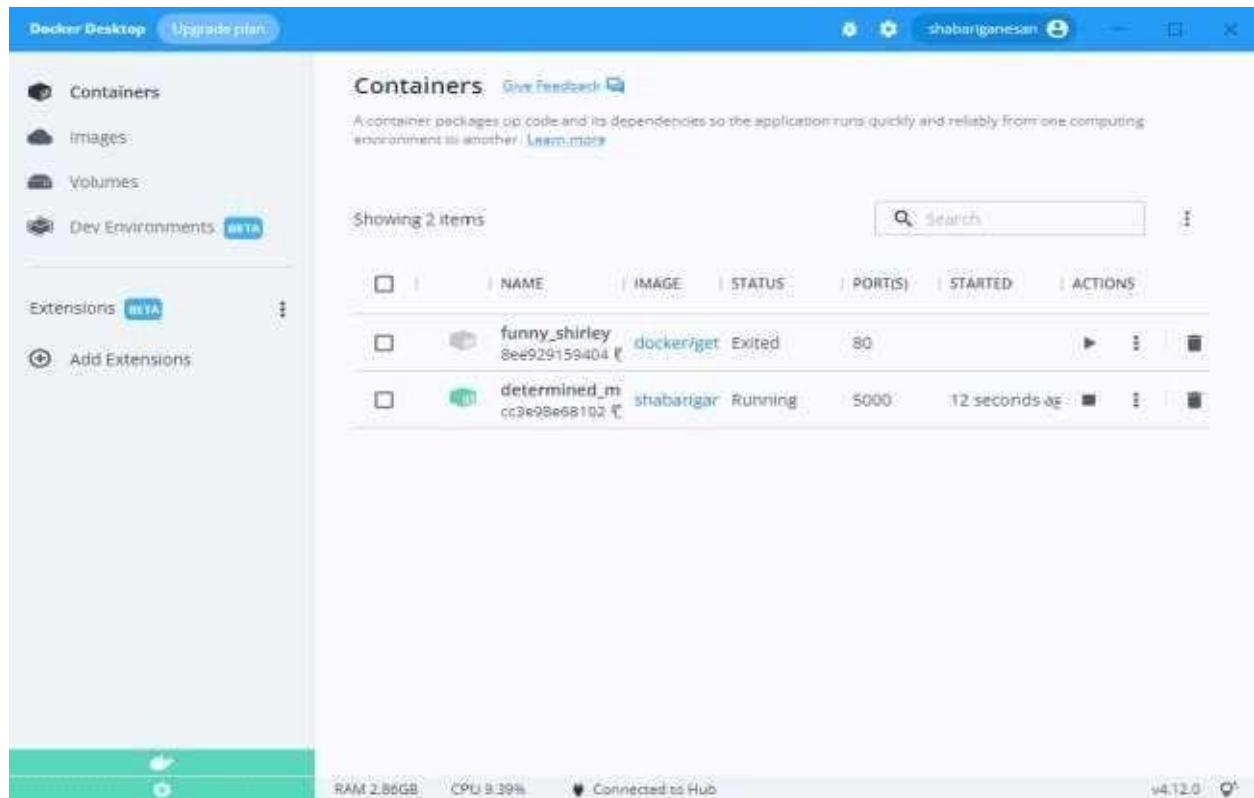

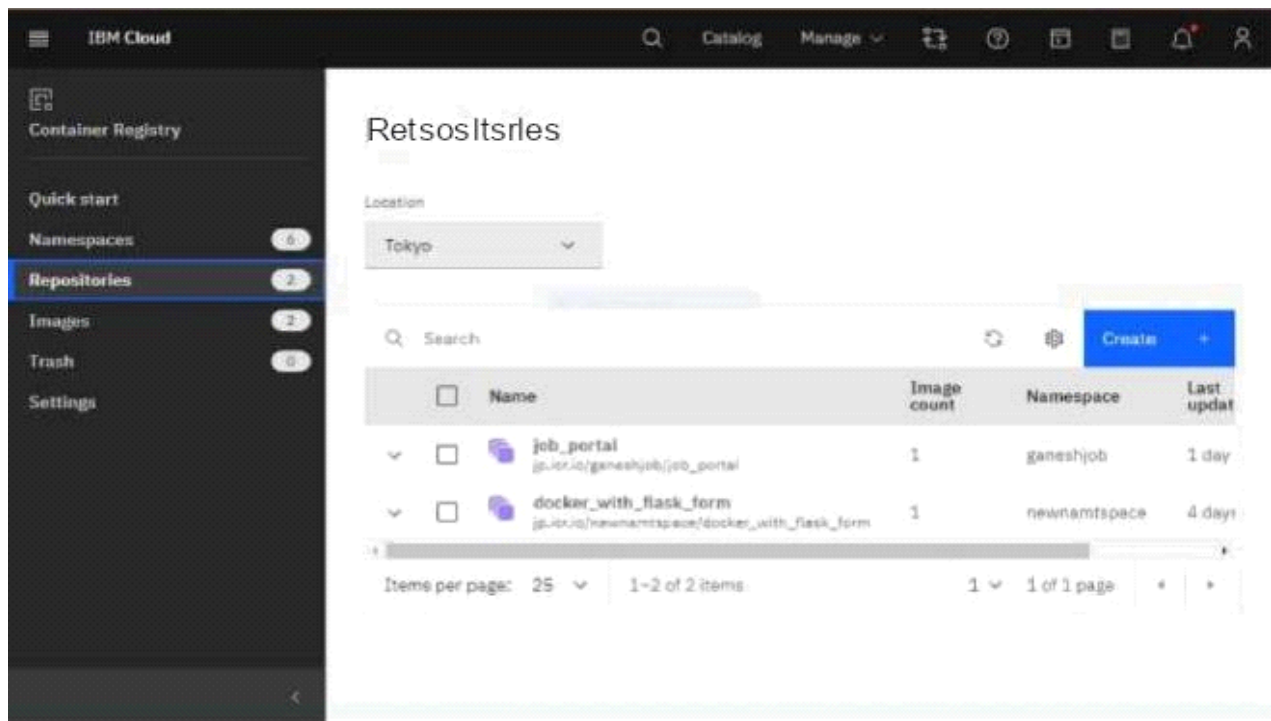

A screenshot of a Windows Command Prompt window titled "Command Prompt". The window shows the execution of Docker commands. The first command is "docker push shabariganesan/docker_with_flask_form", which results in an error: "An image does not exist locally with the tag: shabariganesan/docker_with_flask_form". The second command is "docker pull shabariganesan/docker_with_flask_form", which successfully pulls the image from Docker Hub. The output shows the image being pulled in layers, with each layer's digest and size listed. The final status is "Downloaded newer image for shabariganesan/docker_with_flask_form:latest".

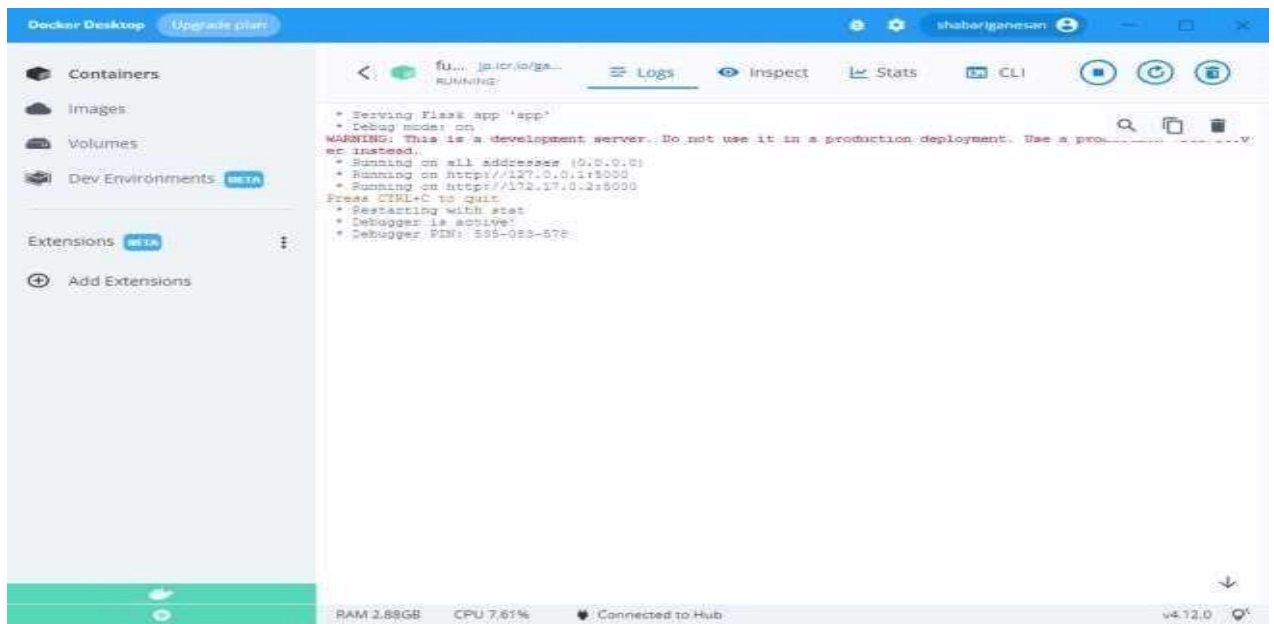

```
