Paper 1: The relationship between capacity utilization and inventory investment

Publication Year: 2007

Author:Sumathi R

Nutrition has been defined as food at work in the body. Food may also be defined as anything

Paper 2: Study on manufacture inventories

Publication Year: (1970)

Author:Krishnamurthy and Sastry

It is the most comprehensive study on manufacturers' inventories. They used the CMI data and the consolidated balance sheet data of public limited companies published by the RBI, in order to analyse each of the major components, like the raw materials, goods-in-process and finished goods, for 21 industries over the period ranging from 1946-62. The study was a time series one although there were some inter-industry cross-section analyses that were carried out in the analysis. The Accelerator represented by change in sales, bank finance and short-term interest rate was found to be an important determinant. The utilisation of productive capacity and price anticipations was also found to be relevant in the study.
